

Aurora Home — Benelux Service Addendum

Supplement to the warranty, returns and shipping policy · valid from 1 February 2026

Scope

This addendum covers the Netherlands, Belgium and Luxembourg. All three are inside the EU single market, so no customs charges apply and the general warranty, returns and shipping policy applies except where stated below.

Delivery

Orders ship from the Frankfurt warehouse. Standard delivery to the Netherlands and Belgium takes three to four working days; Luxembourg takes one working day longer because of the onward leg from the Belgian hub.

Destination	Standard	Express	Free over
Netherlands	3–4 working days	2 working days	€59
Belgium	3–4 working days	2 working days	€59
Luxembourg	4–5 working days	2 working days	€69

Installer collection

Installer partners in the Benelux may collect stock directly from the Antwerp depot instead of waiting for delivery. Collections must be booked a working day in advance through the partner portal, and the collecting driver must present the order reference.

Language of documentation

Product documentation ships in English and German. Dutch and French translations of the installation guide are available on request but are not maintained at the same revision as the English original; where the two differ, the English text is authoritative.

Returns

Return windows and restocking fees follow the general policy. Returns from the Benelux are consolidated weekly at the Antwerp depot, so a refund typically completes three to four working days later than one sent from within Germany.
